Media for  
Industrial Microbiology

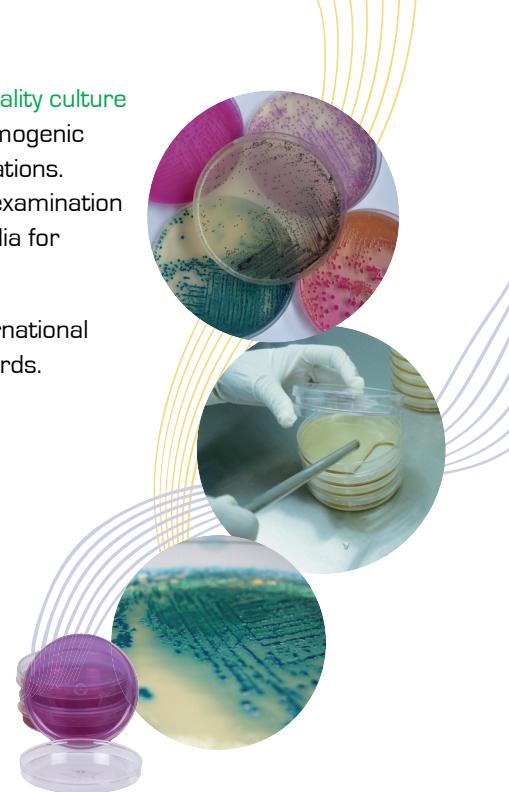

Laboratorios CONDA, one of the world leaders in the design and manufacturing of high quality culture media, currently offers more than 400 different products, among which you will find chromogenic media, ISO-formulated media and custom-made media for many different industrial applications. From hygiene control, through food and beverage poisoning prevention, to microbiological examination of cosmetic and pharmaceutical products, CONDA supplies a wide variety of different media for each field so that customers can find the most suitable product for their needs.

CONDA complies with the ISO 9001 standard, and our products comply with various international standards such as ISO, the European Pharmacopoeia, FDA, APHA, USP and AOAC standards.

Strict quality control procedures are adopted prior to, during and after the manufacturing process to ensure quality products and batch-to-batch consistency. We also exert tight control over selection and treatment of all raw materials and components (peptones, carbohydrates, minerals, chemicals, agar and other additives) used in the manufacturing process. Physical-chemical characteristics are tested, and media also undergo additional microbiological tests that guarantee growth, differentiation, biochemical performance, recovery of small inocula, selectivity, etc. A quality certificate is supplied with each product.

Our reputation and success throughout the world are the result of a combination of uncompromising quality systems, technical expertise and innovative thinking.
